

The Firenock™ Advantage

- Firenock cannot be shut off for 4-8 seconds once it is activated; the circuit's logic protects Firenock against bone hits and shock from shutting off the light. Shock that usually shuts off the light in other brands and products would instead reset the internal timer in Firenock. Thus the light is lit at the most critical moment.
- Operation of Firenock will not affectnock tuning since Firenock uses the same actuator and method to turn on and off, no movement of the nock is needed.
- Long lasting focus beam LED; Firenock with its standard battery will stay lit up to 24 hours.
- Firenock turns on automatically when you fire the arrow, no physical contact (button) is required.
- Firenock is easy to install; no battery stopper, no glue, no heat, or no other tool is needed.
- No expensive single use mini light stick, and thus no continuous light to spook the game.
- Firenock is amazingly light weight (~22 grains with the nock).
- No protruding metal prongs to damage your arrow shaft.
- Firenock is a shock and knock proof design.
- Gold plated battery connector for extra reliability.
- Firenock is a spin balanced design.
- 3 matched-weight practice nocks are included.
- Battery is field changeable.
- Nock is field changeable.
- Firenock is proudly designed in the heartland of the US in Henry, Illinois. (a city of 2600 people and 5000 deer within the surrounding areas)

**See inside for installation manual
or visit www.firenockintl.com**

The system includes:

- 3 hunting magnetic circuit w/LED color (front upper right hand corner)
- 3 matched weights
- 6 "A" style nocks (3 green & 3 red)
- 3 MIL-spec O-rings
- 1 actuator (button type black anodized magnet)
- 1 die cut 3M VHB weather proof double sided tape

BATTERIES SOLD SEPERATELY

Firenock "A" style nock will fit most common slim diameter arrow shafts with ID (Internal Diameter) of 0.202" - 0.204":

Beman:	Team REALTREE® MFX™, Classic MFX™, BLACK MAX™, MAX-4™,
Carbon Xpress:	CX Edge™, CX Edge™ Hunter.
Easton:	A/C Super Slim, ST Axis Full Metal Jacket, ST Axis Full Metal Jacket Camo, ST Axis Full Metal Jacket Dangerous Game, ST Axis Realtree APG, ST Axis Mossy Oak Obsession, ST Axis, ST Axis Junior.
Trophy Ridge:	Crush, Blast, Hailfire, Wrath

Warning: Firenock must make multiple contact points with the inside wall of the arrow in order to function properly. Presence of uni-bushing while using Firenock will void all warranty.

DISCLAIMERS: Firenock is meant to use on arrows for foam targets and big game animals. Shooting into hard objects like rocks, concrete blocks, hard wood, screens of video dart systems, broad head targets, or small game can cause the battery wire connector to break or nock to crack. Use bow wax on nock collar for Firenock circuits can be damaged by moisture and blood with prolonged exposure. Glue the matched weight into the nock to prevent damage of arrow due to breaking free of the matched weight when excessive force at targets.

LEGAL NOTICE: Please check with local DNR office before harvesting game with a electronic lighted nock.
