

The Firenock™ Advantage

- Firenock cannot be shut off for 4-8 seconds once it is activated; the circuit's logic protects Firenock against bone hits and shock from shutting off the light. Shock that usually shuts off the light in other brands' product would instead reset the internal timer in Firenock. Thus the light is lit at the most critical moment.
- Operation of Firenock will not affect nock tuning since Firenock uses the same actuator and method to turn on and off, no movement of the nock is needed.
- Long lasting focus beam LED; Firenock with its standard battery will stay lit up to 24 hours.
- Firenock turns on automatically when you fire the arrow, no physical contact (button) is required.
- Firenock is easy to install; no battery stopper, no glue, no heat, or no other tool is needed.
- No expensive single use mini light stick, and thus no continuous light to spook the game.
- Firenock is amazingly light weight (~25 grains with the nock).
- No protruding metal prongs to damage your arrow shaft.
- Firenock is a shock and knock proof design (with O-ring).
- Gold plated battery connector for extra reliability.
- Firenock is a spin balanced design (with O-ring).
- 3 matched-weight practice nocks are included.
- Battery is field changeable.
- Nock is field changeable.
- Firenock is proudly designed in the heartland of the US in Henry, Illinois. (a city of 2600 people and 5000 deer within the surrounding areas)

UPC Code / Proof of Purchase

**See inside for installation manual
or visit www.firenockintl.com**

The system includes:

- 3 hunting magnetic circuit w/LED color (front upper right hand corner)
- 3 matched weights
- 6 "S" style nocks (3 green & 3 red)
- 3 MIL-spec O-rings
- 1 actuator (button type black anodized magnet)
- 1 die cut 3MVHB weather proof double sided tape

BATTERIES SOLD SEPERATELY

Firenock "S" style nock will fit most common standard diameter arrow shafts with ID (Internal Diameter) of 0.242" - 0.246":

Arrow Dynamic: 395 Mag

Beman ICS: Hunter Elite, Hunter, Hunter Junior, Venture, Beman 9.3, Energy

Cabela's: Carbon Hunter, Stalker Extreme Carbon, Outfitter Series

Carbon Xpress: Aramid KV, Maxima Hunter, Maxima, Terminator Hunter, Terminator Select, Terminator Select Hunter, Terminator Lite, Terminator Lite Hunter, Terminator Lite Hunter, Carbon Rebel, Carbon Rebel Hunter, Thunderstorm SE, Thunderstorm, Heritage

Carbon Impact: Stealth XLT, Trophy Hunter, Carbon youth

Carbon Tech: Cheetah, Panther, Rhino, Whitetail

Easton: LightSpeed, PowerFlight, or any fits the Super Nock, 3D Super Nock, A/C 3-60/340"

Forge: Extreme Kevlon™

Vapor: Predator, Predator Hunter, Hunter Pro, Pro Black, Pro Whitetail, Whitetail, Carbon Aluminum .400", Carbonwood, Wayne Carlton Signature, Vapor Jets

Victory: V-Force, V-Force HV

* Shave off all ridges of the nock to fit due to its 0.240" internal diameter.

Warning: Firenock must make multiple contact points with the inside wall of the arrow in order to function properly. Presence of uni-bushing while using Firenock will void all warranty.

DISCLAIMERS: Firenock is meant to use on arrows for foam targets and big game animals. Shooting into hard objects like rocks, concrete blocks, hard wood, screens of video dart systems, broad head targets, or small game without the use of optional battery end cap can cause the battery wire connector to break or nock to crack. Use bow wax on nock collar for Firenock circuits can be damaged by moisture and blood with prolonged exposure. Glue the matched weight into the nock to prevent damage of arrow due to breaking free of the matched weight when excessive force at targets.

LEGAL NOTICE: Please check with local DNR office before harvesting game with a electronic lighted nock.
